

Preparation of Digital Images for Projection

Appendix. Lightroom 2

If needed use Windows Explorer to create an export folder.

From the Library Module in Lightroom Click [Export]

Tick Export to: Specific folder, Choose folder

Name the file using **File Naming Specification**

File setting

Format: Jpeg, Quality: 80, Colourspace: sRGB

Tick Resize to fit

For Landscape set the Width to 1024

For Portrait set the Height to 768

The resolution setting is immaterial.

Tick Sharpen: Choose screen, Amount: Standard

Metadata: Don't tick anything

Post processing: Show in Explorer.

Click [Export]
